Direct Conversion  
Full-Field Digital Mammography

## New Standards of Digital Mammography

Fear, suffering and anxiety.  
These are common feelings to all women in the face of breast cancer.

At Medi-future, digital mammography goes beyond a product.  
We want women worldwide to have the greatest care with the most accurate examination.  
That's why we are 100% dedicated to superlative full-field digital mammography.

Brestige has been born for women's breast health. Brestige ensures women's beauty and dignity.  
Beautiful design, reliable image, comfortable compression and infinite scalability  
of Brestige make a new history of digital mammography.

Radiologist's Review Workstation

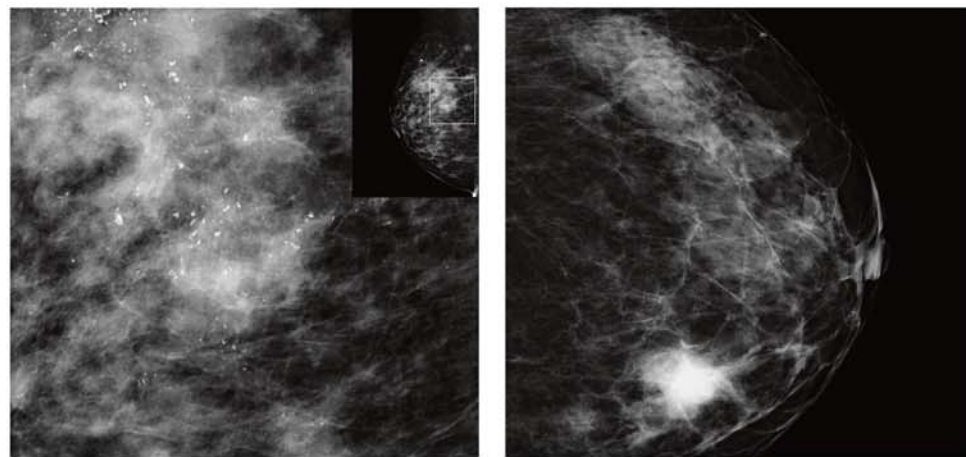

## Superb Image Quality with Higher DQE Lower Dose

- Higher productivity due to prompt image capturing and minimum time between exposures.
- Consistent superb image quality through amorphous selenium flat panel detector, innovative software technology and creative system architecture.
- More accurate Automatic Exposure Control (AEC) and automatic collimator selection.
- Reduced patient dosage by using x-ray tungsten tube assembly.
- Excellent scalability providing a series of planar images (tomosynthesis).

## Ergonomic, User-Friendly Design

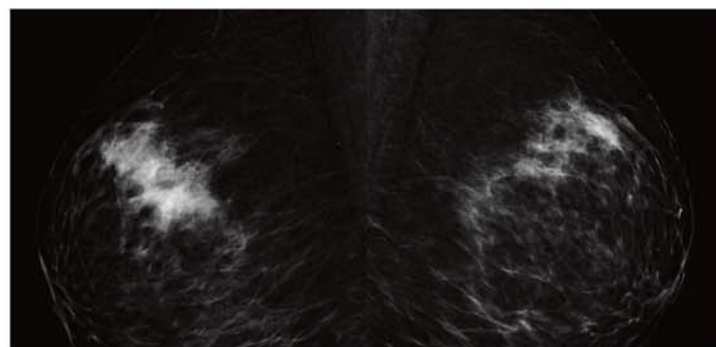

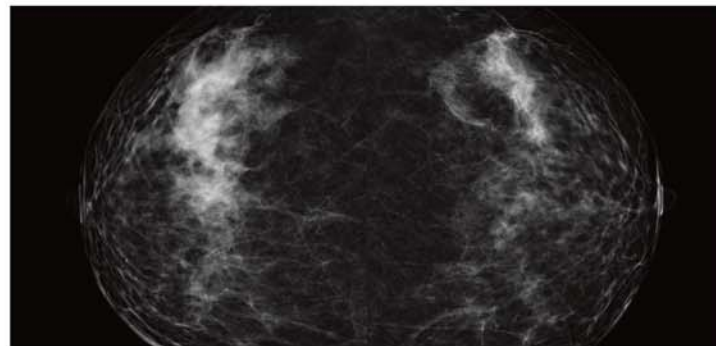

Dedicated to women's breast health, Brestige is designed to minimize the discomfort of patients.

- Feeling-based design helps patient feel relaxed.
- Remarkably slim head enables comfortable patient positioning.
- Unique user interface in the handle enables easy focusing on the patient.
- Soft-touch paddle by microprocessor control ensures consistent compression and exposure as well as patient's comfort.
- User-convenient toolbar and viewer design enable a technician with little training to easily operate the system.

Easy, Convenient and Unique User Interface

Color LCD Main Display

Tungsten Tube, Slim Head

Smooth Curved Detector Cover

High Frequency X-ray Generator

## Ideal, Optimized for the Accurate Diagnosis

### All-in-one digital breast care solution

- User Interface, developed by our own technology, only for Brestige
- Optimized for both screening and diagnostic mammography
- Providing all needs of special studies;
 

Digital high resolution spot imaging	Digital and geometrical magnification
Digital needle localization	Digital specimen radiography
Digital galactography	Digital stereotactic biopsy

#### • X-Ray Tube

Filter : Rh & Ag  
Target : Tungsten

#### • X-ray Generator

Type : Ultra High Frequency Inverter  
Switching frequency : 100khz

#### • Digital Image Detector

A-Selenium + TFT array  
Detector size : 24cm x 30cm (large type)  
18cm x 24cm (small type)  
Pixel size : 85µm

#### • Acquisition Workstation

Storage capacity : 20,000 raw and 20,000 processed images

## Stereotactic Breast Biopsy Add-on for Brestige

- Accurate Targeting
- Space-Saving
- Easy to Install & Use
- Comfortable Positioning

## The Global Leader in Women's Healthcare

We aim to build the world where all women across the globe improve the quality of life and lead their happy life.
